HSE-on-the-GO
BEHAVIOR BASED SAFETY OBSERVATION SYSTEM

Cloud-Powered Audit System

Best suited for any work environment, HSE-on-the-GO is the world's first proprietary system that ensures compliance at all levels by allowing your stakeholders to report any health, safety and environmental issues, on the go! It is a cloud -powered system allowing for real-time behaviour and audit, accessible via a customized mobile application system complete with GPS indicator.

Behavior & Compliance

HSE-on-the-GO aims to increase the level of compliance by implementing a continuous observation system for your workers' behaviour. Increased compliance greatly reduces risk of unwanted accidents.

Low compliance
increases risks

High compliance
reduces risks

SIMPLIFY HSE PROCESSES
HSE-on-the-GO simplifies reporting processes greatly. The collaborative system greatly improves reporting & audit processes.

OWN & ACT
With increased realtime awareness as situations arise, HSE-on-the-GO would demand instant action & feedback from relevant parties.

EMPOWER HSE PERSONNEL
The collaborative nature allows for your HSE management personnel to quickly publish reports, empowering them to streamline all HSE related

FULL RANGE OF BENEFITS

✔ *Switching over to a web-based & mobile apps will eliminate paper logs, which are not only un-reliable but costly.*

✔ *Streamline delivery management (Subject, Object, etc.); Replace your existing manual processes log book; empower staff, Sender and Receiver to record delivery transaction.*

✔ *Time spent manually in recording the transaction is eliminated; where everything to be done digitally and automatically tracked and stored.*

✔ *Enhance productivity; communication and tracking becomes more accurate, real-time and cost-efficient.*

✔ *Empower staff to process and track delivery; alerting staff/receiver for such delivery on mobile and email.*

✔ *Facilitate staff to trace their delivery (asset) whereabouts*

SCAFFOLDING
MANAGEMENT
SOFTWARE

SOLUTION FOR
CONSTRUCTION
& OPERATION
FACILITY

Scaffolding Management Software is a comprehensive software solution that manages scaffold requests, approvals, production and material inventory effectively and efficiently. It supports entire cycle of scaffolding management and comes with a customized work-flow to validate steps to promote safe working practices.

ADVANCED FEATURES

- ✔ *Automate scaffolding operation workflow*
- ✔ *Decision support tools planning, approvals & management*
- ✔ *Design & material estimation (preliminary)*
- ✔ *Job hazard analysis & safety inspections*
- ✔ *Advanced compatibility on most devices*

WHY SCAFFOLDING MANAGEMENT SYSTEM?

Automating scaffold lifecycle helps to control flow of information with databank of scaffold requests, production records, dashboards for the efficient information gathering and sharing.

▶ Reports, graphs, analysis & KPIs to make effective business decisions and for efficient pre-planning. Electronic management of scaffold inventory helps to portray the current scenario and motivates towards effective usage.

▶ Easy access via smart devices - anywhere & anytime. Intuitive front-end user interface is linked to a secure back-end that is web-based.

OPERATION WORKFLOW

- Paper less request (new scaffold, alteration, minor modification & dismantling), approval, tracking & inspection

- Time stamped approval & recommendations

- Configurable to adopt your approval workflow

Review Request
Revise Request
Add'l Analyses

Requester → Request → Data Correction → Submit → Review → Accept → Planning
Review → Reject

| New Scaffold/ Modification/ Dismantle Request | Request Approval | Task Allocation | Scaffold Inspection | Work Started (Erection/ Modification/ Dismantle | Production Report Submission |

Easy communication, collaboration and tracking of Scaffold Life Cycle

TOOLS & FUNCTIONALITIES

- Web-based solution
- User friendly interface
- Smart device support
- Email alerts & notifications

- Smart device support
- Analysis of interlinked data
- Smart device support
- Security

ACHIEVEMENTS

✓ 0% scaffold request lost
✓ Timely request approvals
✓ Reduction in delays of scaffold availability
✓ Reduced communication gap/error
✓ Savings in scaffold production cost
✓ Rapid kick-off meetings between scaffold requestor and scaffold team
✓ Timely scaffold inspections and immediate alerts for un-safe scaffolds
✓ Sound monitoring of team productivity
✓ Easy tracking of scaffolders' training, competency level & certification
✓ Real-time reporting, KPIs and statistics in no time – without any manual effort
